PROFESSIONAL SUMMARY

Computer Science graduate with web development and full-stack software engineering experience using Python, FastAPI, React, PostgreSQL, Docker, REST APIs, and AWS. Built and deployed cloud applications featuring backend APIs, authentication, relational databases, and AI integration, with additional experience contributing to public open-source projects through GitHub.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript/TypeScript, Java, SQL, HTML/CSS, C++, C#
- **Technologies:** FastAPI, React, Next.js, Node.js, PostgreSQL, SQLAlchemy, Docker, REST APIs, Godot, Git/GitHub, AWS (EC2, S3, RDS, Amplify, CloudFront), OpenAI API
- **Concepts:** Object-Oriented Programming, Algorithms, Data Structures, API Development, Authentication, Software Testing, Machine Learning Fundamentals

PROFESSIONAL EXPERIENCE

Web Developer (Volunteer) | Black Horse Trading Co. | 2015-2019

- Developed a responsive business website using HTML, CSS, JavaScript, and jQuery, helping increase business visibility.
- Diagnosed and resolved frontend issues involving form behavior, user interactions, and cross-page functionality.
- Managed deployment, hosting, SEO, and ongoing website maintenance to support customer engagement.

Stay-At-Home Parent | 2015-Present

- Managed household operations while pursuing technical education, software projects, and open-source contributions.

OPEN SOURCE CONTRIBUTIONS | May 2026-Present

- Contributed code, bug fixes, and documentation improvements to multiple public open-source repositories through GitHub.
- Submitted and merged pull requests involving Java, Python, SQL, C, JavaScript, JSON, and Markdown.
- Collaborated using Git branching, pull requests, code reviews, and issue tracking.

PROJECTS

PantryPal AI | [Demo](#) | [Code](#)

- Built and deployed a full-stack pantry management application using FastAPI, React, PostgreSQL, SQLAlchemy, and Docker; conducted user testing with 5+ users and implemented feedback to improve navigation and recipe generation.
- Built secure REST APIs with JWT authentication, CRUD operations, search, filtering, and guest access.
- Integrated the OpenAI API to generate recipes and deployed on AWS using EC2, Amplify, and CloudFront.

Stable Ops | [Demo](#) | [Code](#)

- Designed and developed a full-stack stable management system using FastAPI, React, PostgreSQL, SQLAlchemy, and Docker; incorporated feedback from users to improve usability and workflow design.
- Built secure REST APIs with JWT, role-based authorization, CRUD operations, filtering, pagination, and sorting.
- Designed responsive React dashboards and deployed on AWS using EC2, S3, RDS, and CloudFront.

Smart Pricing Engine | [Demo](#) | [Code](#)

- Developed a pricing optimization platform using FastAPI, Python, and JavaScript.
- Built REST APIs and applied machine learning to improve pricing decisions.

EDUCATION & CERTIFICATIONS

- B.S. in Computer Science | Western Governors University
- Master of Business Administration (MBA) | Ottawa University
- LPI Linux Essentials
- AWS Solutions Architect – Associate | Exam Scheduled: Oct. 2026
